

**Type 483 Heel Resistant Brickslot 100 access unit - galvanized steel**

Access unit (may be used with catch basin and can also be used with channels)

Description	Part No.	Overall Depth		Weight
		in	mm	
Type 483 Heel Resistant Brickslot 100 Access Unit - 19.69" (0.5 m)	138052	4.06	103	11.0

**Specifications**

**General**

The surface drainage system shall be ACO Drain Brickslot, as manufactured by ACO Polymer Products, Inc. or equal approved.

**Materials**

The Brickslot top is manufactured from 11 gauge galvanized steel.

The nominal clear opening for Brickslot is 7/8" (22.35 mm) with two – 5/16" (8 mm) slot openings and with a 1/4" (6.35 mm) bar between the two openings. Overall width is 4.84" (123 mm). An offset slot helps prevent debris from being trapped. For use with K100, KS100, MembraneDrain, SlabDrain (H100-10, H100-8, H100K-8, H100KS-8), and the K100 Series 900 catch basin. See separate ACO Spec info sheet for channel details. Brickslot rests in the grate seating of the channel, the anti-shunt lugs help prevent lateral movement and the weight of covering material keeps the unit secured. Access units have frames that fit catch basins with a separate unit that can be removed for maintenance.

**Installation**

The trench drain system shall be installed in accordance with the manufacturer's installation instructions and recommendations.
